

All About Children Learning Center

We have reached a level 1 accreditation with both Md. Excels and MSDE. "Hooray"

Most of our staff has been at AACLC for over 2 years. There is a harmony amongst us that works here. We all strive to make sure things are done properly and the children are our first priority. Our director at AACLC tries her best to keep things fun and updated. She makes a point to go out of her way for her staff and the parents of the children that attend here. This is what sets us apart from the rest. I believe that you need to have a strong director in any daycare in order for things to run smoothly. All of our staff here are CPR certified, and first aid certified. All of our teachers have received their accreditation and are working on receiving higher levels of credentialing. The license at the center has gone from 80 children last year to 92 this year. Each one of the teachers at this center has also received a grant from CCBC in the last year. Also 2 of the teachers here have earned a shining star awards in the past. Our yearly state inspection showed zero violations. All About Children Learning Center has two nurses available at all times if ever the need arises. Since the children are our first priority each teacher has completed both the Emergency preparedness course, and the medication training. We are all very proud of our accomplishments here, as you would see if you were to walk down our center hallway you will find all of our teacher's accreditation certificates on display.

Last winter some of the children at the center participated in a food drive. They actually went shopping for their donations and brought them back to the center for the food drive. Then they helped take all of their donations to the Southwest Emergency Services. The children were taught how every item they collected and donated would help people in need.

We had an awesome summer this year at All About Children Learning Center. As always the summer camp was a big hit with the children. Whether they are tie-dyeing a t-shirt, or participating in water day, the children were always excited to come and play and enjoy their sunshine filled days.
